Can socialism make sense?

Aims

This course requires you to read the introduction to the book, Can Socialism Make Sense? and selected chapters. This will provide an overview of the work and help you understand the texts and debates in the rest of the book.

The specific aims of this course are:

- To understand the strengths and limitations of working class socialism
- To explain how and why Stalinism warped socialism
- To understand and respond to the key objections to socialism
- To enable you to make propaganda for basic socialist ideas
- To discuss the lessons the AWL draws from socialist debates

Methods

There are ten sessions in this course. You need to read parts of the introduction and then other selected chapters, before having a discussion.

1. Why socialism?
2. Socialism vs Stalinism
3. Bolshevism vs Stalinism
4. The working class and oppression
5. Democracy and socialism
6. Human nature and socialism
7. The lies against socialism answered
8. Debating socialism – part 1
9. Debating socialism – part 2
10. Why you should be a revolutionary socialist

These suggestions are for convenience and clarity – they do not prevent comrades reading the whole book for themselves. Some chapters are not covered in this educational series, but repay reading or re-reading.

Rather than just mechanically going through the questions, it is better for everyone involved to raise their own points and to have a wide-ranging debate.

It is best to have a study copy of the book, with your own annotations, highlights, comments and questions. This will help clarify key points and help those who first complete the course to facilitate it with other comrades and contacts at a later date.
Can socialism make sense?
